Single use RECAL is a range of pH Buffers in a wide mouth disposable container, which can be used for direct calibration of the electrode.

### Advantages:

- convenience- saves time, more efficient calibration, avoids waste and spillage;
- mobility- these are easy to store and transport;
- economical- no need for separate measuring container for use in the calibration of the electrode;
- accuracy- the possibility of contamination is eliminated giving increased confidence in the results;
- traceability- each container is labelled with lot number and expiry date and buffers are directly traceable to N.I.S.T. Standards.
