

Experience Safety.

The Containment Solutions and
climate & stability testing systems
from **Weiss Pharmatechnik**.

Experience.

How we can assure a holistic approach?

Because we are a young company with decades of experience.

We are Weiss Pharmatechnik GmbH. We have been around since 2015, and yet we have a lot of experience: our company was formed from the merger of GWE (Gesellschaft für Wasseraufbereitung und Energierückgewinnung) and BDK Luft- und Reinraumtechnik, both of which were founded around 1980. The resulting experience, tradition and synergies from this merger are what characterise Weiss Pharmatechnik today. And guarantee our customers customised, needs-based solutions in accordance with the highest quality standards.

We offer safe solutions for containment and stability testing.

Companies in the pharmaceutical industry, but also in many other areas of life sciences, automotive and electronics, have long placed their trust in Weiss Pharmatechnik solutions for containment, clean air and climate testing. Our product range includes barrier systems, laminar flow systems, safety cabinets, isolators, airlock systems and pharmaceutical climate and stability testing systems. Our range of services is complemented by comprehensive services that ensure the long-term, smooth operation of your systems.

Safety.

The containment systems from Weiss Pharmatechnik.

Our systems? Always open to your wishes, never to unwanted emissions.

Protect your employees and products from contamination: Our containment systems are crucial for worker safety, environmental protection and maintaining product quality, especially when handling substances that pose a high risk to health and safety.

Safety Workplaces

- Safe working with hazardous substances
- Optimum personnel and room protection
- Targeted collection of hazardous substances
- Robust retention capacity in accordance with ISO 14175-3

Laminar Flow Systems

- Reliable laminar flow technology
- Stable product and personnel protection
- Workplaces and plant superstructures
- In accordance with cleanliness class A (EU GMP)

Safety Workbenches

- Standard and customised sizes
- For safety laboratories S1 to S4 or BSL 1-4 (Biosafety Level)
- In accordance with DIN EN 12469 and DIN 12980
- Ergonomic and highly efficient

The stability testing systems from Weiss Pharmatechnik.

Our products are tough on your products.

For good reason. Our climate testing systems are an indispensable part of quality control and assurance in the pharmaceutical industry. And play an important role in ensuring the safety, efficacy and quality of pharmaceutical products over their entire shelf life.

Our pharmaceutical climate test systems offer you a variety of possible environmental simulations:

- Stability Testing
- Transport Simulation
- Freeze/Thaw-Studies
- Climatic Processing
- Long Term Storage Evaluation
- Stress Testing

Barrier Systems

- 3-zone airflow concept
- Optimum product and personnel protection
- Customised solutions
- For hazardous substances from OEB 1-5
- In accordance with purity class ISO 5

Isolators

- For aseptic processes and active/toxic substances
- Personnel and product protection
- Suitable for hazardous substances up to OEB 6
- Including H₂O₂ decontamination

Cleanrooms & airlock systems

- Customised turnkey solutions
- Complete equipment incl. ventilation, control and monitoring technology
- Active and passive airlocks
- Qualification and maintenance

The services offered by Weiss Pharmatechnik:

Experience Service.

If you have purchased a system from Weiss Pharmatechnik, you will not only experience safety, but also exceptional service. Starting with sound, personalised advice, from installation to commissioning, from maintenance to repair, through to further after-sales services, Weiss Pharmatechnik is your dedicated partner for the support and maintenance of your solution: We are there for you personally - always!
