EICKEMEYER® NARKOVET BASIC ANAESTHETIC UNIT

The NarkoVet Basic is a complete anaesthesia machine. Depending on the size of the patient it is supplemented with a corresponding anaesthetic system. Due to its low cost and ease of use, the device is ideal for entry into inhalation anaesthesia.

Table Model

- ▶ High accuracy Rotameter, 0.1 – 5.0 litres
- ▶ EICKEMEYER® TEC 3 Isoflurane Vaporiser
- ▶ Oxygen bypass
- ▶ Patient outlet: Ø outer: 22 mm;
Ø inner: 15 mm

213067

€ 1900

Circle Breathing System (semi-disposable)

- ▶ For patients > 7 kg
- ▶ Twin patient tubing with
360° swivel y-piece
- ▶ 2 litre rebreathing bag
- ▶ Scavenge adaptor: 30 mm
female to 22 mm male
- ▶ APL valve

213096

€ 220

OxyVet IV Oxygen Concentrator

Oxygen concentrator for use in oxygen therapy and anaesthesia. An oxygen concentrator draws in room air, separates the oxygen from other gases in the environment and delivers the oxygen at high concentrations.

- ▶ Saving costs and effort: No oxygen bottle required, lower power consumption
- ▶ Simple operation thanks to the clear arrangement of the setting functions and monitoring information
- ▶ High patient safety through visual and acoustic alarms
Noise level: ≤ 55 dbA
- ▶ Flow rate continuously adjustable from 0.5 – 5 l/min
- ▶ Output of up to 93 % oxygen (± 3 %)
- ▶ Incl. Bubble humidifier and O₂ hose
- ▶ Dimensions (in cm): L 34 x W 37 x H 67
- ▶ Weight: 15.3 kg
- ▶ 1 year warranty

213180

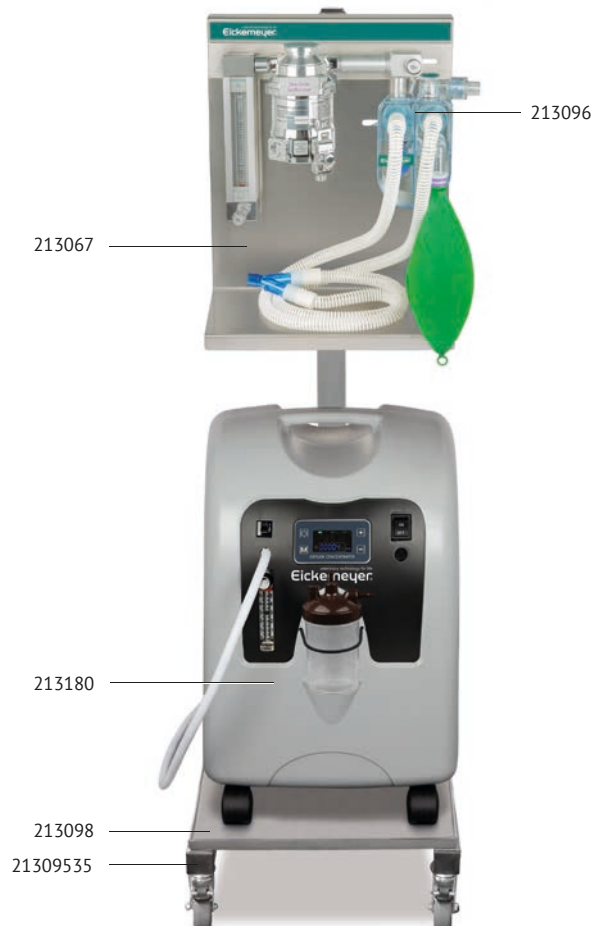

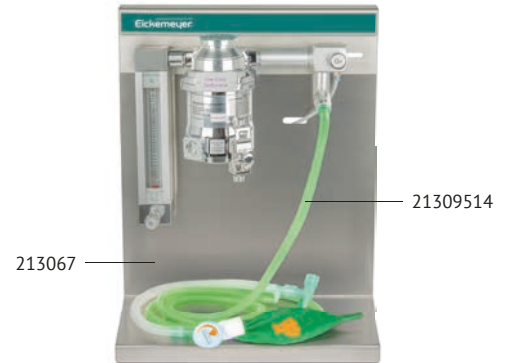

€ 720

Ayre's T-Piece

- ▶ For patients < 7 kg
- ▶ Length: 1.8 m includes:
0.5 litre rebreathing bag
- ▶ APL valve

21309514

The EICKEMEYER® NarkoVet Anaesthetic Unit is now even more flexible: Can be set up as a desk, wall or stand model.

Table mounted Model

- ▶ Flow Meter (0.1 – 5.0 l/min)
- ▶ System pressure gauge
- ▶ Infinitely adjustable pressure relief valve
- ▶ Oxygen bypass
- ▶ TEC 3 Isoflurane Vaporiser
- ▶ Soda Lime canister and accessories
- ▶ Safety valve for manual ventilation included (213083)
- ▶ Suitable for small animals up to 80 kg
- ▶ Dimensions (in cm): L 32 x W 25 x H 51

NARKOVET SAV RESPIRATOR FOR SMALL ANIMALS

The main cause of serious anaesthetic incidents in veterinary practices is the patient's unnoticed apnoea. Routinely controlled ventilation helps to drastically reduce such risks during anaesthesia and thus ensures the optimal safety of your patients.

- ▶ The setting of the NarkoVet SAV is extremely user-friendly, just set the patient's body weight and the intelligent software automatically adjusts all other ventilation parameters
- ▶ Simple control – the ventilator controls all breathing parameters independently
- ▶ Three different ventilation modes: volume-controlled ventilation (VCV), pressure-controlled ventilation (PIP-CV), apnoea mode (controlled spontaneous breathing with apnoea detection)
- ▶ Clear “at a glance” parameters thanks to the large colour display
- ▶ Inclined control panel for easier reading and operation by touch
- ▶ Acoustic and optical alarms ensure high patient safety
- ▶ Long battery life of up to 4 hours

Technical specifications

- ▶ Ventilation rate: 2 – 60 bpm
- ▶ Tidal volume: 20 – 1,500 ml
- ▶ Maximum ventilation pressure: 5 – 35 cmH₂O
- ▶ Release pressure -9.0 – -1.0 cmH₂O
- ▶ Patient weight range: 2 – 100 kg
- ▶ Touchscreen: 5 inch LCD colour display, 800 x 480 px
- ▶ Mains and battery operation, battery life up to 4 hours
- ▶ Power supply: 100 – 240 V
- ▶ Mains voltage: 50/60 Hz
- ▶ Dimensions (in mm): L 253 x W 224 x H 112
- ▶ Weight: approx. 3.2 kg

Ventilators are pneumatically driven.

A compressed air source is required to operate the NarkoVet SAV (e. g. compressor item no. 17430002).

213015

€ 3150

AIR COMPRESSOR AND MICRO OIL FILTER

Air Compressor

- ▶ Required for NarkoVet SAV
- ▶ Quiet, 40 dB (A) (as a fan)
- ▶ Low maintenance
- ▶ Compact design
- ▶ Powerful (340 Watt)
- ▶ 230 V, 8 bar / 116 psi, 37 l / min
- ▶ 6 l capacity
- ▶ Dimensions (in cm): L 45 x W 43 x D 20

17430002

€ 704

Micro Oil Filter

- ▶ Reduces the oil content in the compressed air down to 0.01 %

LIFEVET 8M/8C MULTIPARAMETER MONITORS

tartu@estdoma.ee

veterinaartarvikud.ee

The LifeVet 8 is a modern, high performance patient monitor that delivers flexibility and efficiency in a compact and portable device. Operation via touch screen is easy and the shortcut buttons provide quick and direct access to the most important functions.

- ▶ Multiparameter display of Respiratory Rate (RESP), Pulse Rate (PR), Oxygen Saturation (SpO₂), Blood Pressure (NIBP), Electrocardiogram (ECG), Temperature (TEMP) and Sidestream Capnography (CO₂ – only LifeVet 8C)
- ▶ High resolution 8.4" LED touch screen with up to 8 waveforms
- ▶ Freely selectable alarm limits and 360° visible alarm display
- ▶ Mains and battery operation (up to 4 hours)
- ▶ Incl. Li-Ion Battery, NIBP Cable with Cuff, ECG Cable with Clamps, SpO₂ Sensor with Clips, Temperature Probe and CO₂ Adapter, CO₂ Cable and Water Trap (CO₂ only LifeVet 8C)
- ▶ Dimensions (in cm): W 27 x H 21 x D 11

LIFEVET 12M MULTIPARAMETER MONITOR

The LifeVet 12M adds modularity to a powerful configured multiparameter monitor. With plug-and-play options, the LifeVet 12M can be configured to meet any requirements of a modern veterinary practice or referral hospital.

- ▶ Reliably measures RESP, PR, SpO₂, NIBP, ECG and TEMP
- ▶ Additional plug-and-play modules provide expanded parameters including IBP, CO₂, Multi-Gas and Oxygen
- ▶ High-Res 12.1" LED touch screen with up to 8 waveforms
- ▶ Customisable keys for fast access to frequently used functions
- ▶ Selectable alarm limits and 360° alarm indicator
- ▶ Mains and battery operation (up to 4 h)
- ▶ Incl. Li-Ion Battery, NIBP Cable with Cuff, ECG Cable with Clamps, SpO₂ Sensor with Clips and Temperature Probe

TREATMENT TABLE WITH ELECTRIC LIFTING COLUMN

The new, optimised treatment table with a three-part electric lifting column is characterised by a very low, minimal height of only 53 cm. This means that heavy dogs can be lifted onto the treatment table easily and without straining the back. The elegant aluminium lifting column encases the quiet and powerful linear drive, which can bring animals weighing over 100 kg quickly and easily to the required working height.

- ▶ Height adjustable from 53 to 100 cm
- ▶ With flat stainless steel tabletop, 60 x 130 cm
- ▶ Heavy base plate with 4 rubber feet for level adjustment
- ▶ Easy to clean and disinfect

600250

€ 1200

X-BASE OPERATING TABLE

The EICKEMEYER® X-Base Operating Table is our most popular surgery table. All components are of the highest quality, making this table a great investment in the future of your practice.

- ▶ X-Base with 4 individually adjustable feet
- ▶ Provides best possible legroom and stability
- ▶ Good working posture whether sitting or standing
- ▶ Slim lift column made of aluminium, pump hydraulic or mains operated
- ▶ Self-contained, maintenance-free lift column
- ▶ Height adjustable from 72 – 112 cm
- ▶ Unidirectional 90° tilt mechanism, one hand control
- ▶ Stainless steel top with rounded, anti-drip edges and drain hole
- ▶ Two tabletop widths: 50 cm and 60 cm
- ▶ Optional heated tabletop
- ▶ Various colour options available

LOW LIFT SCISSOR TABLE II

tartu@estdoma.ee

veterinaartarvikud.ee

The EICKEMEYER® Low Lift Scissor Table II is perfect for lifting and transporting larger patients without unnecessary handling and movement. The basic stationary table is available in eight different colours and the additional options available make this table a real all-rounder for your practice.

- ▶ Ideal for examination, prep, dental treatment and procedures
- ▶ Minimum height of 28 cm allows large dogs to walk onto the table
- ▶ Maximum height of 105 cm allows you to examine smaller patients without having to hunch and lean forward
- ▶ All parts made from high quality German stainless steel
- ▶ Smooth, polished tabletop (60 x 130 cm) with rounded corners, anti-drip edges and a drain hole
- ▶ Silent electric operation via foot pedal
- ▶ Includes power supply and tie down cleats

EICKEMEYER® LED 4 EXAMINATION LIGHT

Modern examination light for the practice with energy-saving LED technology. With an illuminance of approx. 50,000 lux at a working distance of 30 cm, the EICKEMEYER® LED 4 examination light offers optimal illumination for a professional examination.

Technical specifications

- ▶ 15 V/11.25 W LED lamp with 4 high-performance LEDs
- ▶ Illuminance: approx. 50,000 lux/30 cm distance
- ▶ Aluminium light head for optimal heat convection and heat radiation
- ▶ Lifespan: approx. 50,000 hours
- ▶ Colour temperature: approx. 4,200 kelvin
- ▶ Gooseneck construction with 90 cm long arm (arm remains in the desired position)
- ▶ Maximum examination height: 165 cm
- ▶ Stable, tilt-proof mobile stand (5-foot stand) made of powder-coated metal

MAGIC 500 PLUS PORTABLE ULTRASOUND UNIT

The MAGIC 500 PLUS sets a new standard of mobility for pregnancy testing in the field. With only 1.1 kg and an integrated rechargeable battery, it ensures maximum comfort and user friendliness

Features

- Long service life: due to the long battery life of the battery supplied, unforeseen extended scanning sessions are not a problem.
- Efficient workflow: Performing measurements on stored images ensures an efficient examination process
- Via a Wi-Fi connection images and videos can be transmitted wirelessly to external devices (PC, laptop, tablet, smartphone) as well as monitors
- Higher diagnostic reliability with Cine Memory (256 frames)
- Individually adjustable ultrasound image
- Protection by splash-proof venting and membrane keypad
- Mounting rings and straps for easy hanging around the neck

Areas of application

- Pregnancy examinations in cattle and horses
- Adjustment aids for optimal work
- Standard measurements and vet pregnancy calculation
- Anti-reflective ultrasound image individually adjustable
- Measurements below 1 mm possible (fat layer thickness measurement)
- Back fat and loin thickness calculation

Technical specifications

- 15cm LED Monitor
- Black-and-white system
- Images and video clips can be saved on the device
- Incl. a switchable, changeable transducer 6.5 MHz, linear rectal, frequency switching of: 4.5 / 5.5 / 6.5 / 7.5 MHz
- Incl. a glove for the left hand (right glove can be reordered)
- Incl. Carrying case
- Integrated battery with up to 5 hours runtime
- Dimensions (in cm): W 16 x H 16 x D 7

MAGIC P1 PORTABLE ULTRASOUND UNIT

tartu@
estdoma.ee

veterinaartarvikud.ee

Highest mobility meets highest performance

The MAGIC P1, with its advanced features, is one of the most highly developed Premium Colour Doppler systems in laptop format. The exceptionally hi-tech equipment guarantees excellent picture quality in all applications.

Adjustment aids for optimal work

- ▶ Clear patient management
- ▶ Optimised image resolution is adjustable
- ▶ Improved pre- and post-processing
- ▶ Image magnification without quality loss
- ▶ Auto Doppler: automatic image parameter adjustment

Special features

- ▶ Excellent image quality through the use of state-of-the-art image enhancement tools
- ▶ Simple report function
- ▶ Special Vet Software (body marks, pregnancy examination)
- ▶ Single crystal technology for brilliant cardio images
- ▶ Extremely fast: boot time from standby mode is only 5 seconds!
- ▶ Long battery life of up to 90 minutes

Technical specifications

- ▶ Picture modes: B, B + B, B + M, M, CDI, B + CDI, PW, CW
- ▶ Doppler modalities: Colour, PW, CW Doppler
- ▶ 15" LED HD Monitor, tiltable
- ▶ Internal memory 240 GB
- ▶ 2 probe connections, 2 USB ports
- ▶ Image export in Windows formats (DICOM optional)
- ▶ Dimensions (in cm): W 35 x H 6.5 x D 37
- ▶ Weight: 4.9 kg

PROFIDENT PLUS DENTAL UNIT

The Profident PLUS is the result of many years of experience. It offers a wide range of applications for both, general practitioners and dental specialists. It is characterised by its modern design combined with high mobility. The stand is adjustable in height and all handpieces are arranged within easy reach of the operator. When a handpiece is removed from its holder, the Profident PLUS automatically supplies air and water to it.

High Speed Turbine (300,000 rpm)

- ▶ Push button burr change for friction grip burrs (FG)
- ▶ Variable burr water cooling facility
- ▶ With LED Illumination

Low Speed Air Motor (20,000 rpm) with Straight Handpiece

- ▶ For long straight shank burrs (HP), diamond discs and prophy heads
- ▶ High torque, forward and reverse rotation
- ▶ Optional water cooling facility (174022)

Built-in Dental Scaler

- ▶ Handpiece with LED Illumination
- ▶ Includes 5 scaling tips

3 in 1 Syringe

- ▶ Precise finger tip control of water, mist or dry air
- ▶ Water connection to connect external dental scaler (e. g. 176870)

Easier, safer & faster dental surgery

DENTANOMIC instruments are premium surgical tools with superb tempered & hardened modular blades making dental extraction in dogs and cats easier, safer and faster.

- ▶ Blades are made from top quality, hardened stainless steel and cut much better than conventional instruments
- ▶ Unique modular design allows easy blade replacement when blades are blunt or damaged
- ▶ Ergonomic handle design promotes safe palm grip, only minimal finger force is required to stabilise the cutting edge
- ▶ Standard handles are perfectly balanced and sized for surgeons with hands up to 7.5 glove size

DIGIVET DR FLAT PANEL DETECTOR

The DigiVet DR is the latest easy DR solution that requires no change to your conventional X-Ray System. A large coverage area of 17 x 17 inches (43 cm x 43 cm) enables a quick and effortless integration. This solution not only enables ultra-fast acquisition times of only 1.2 seconds but also features an amazing 9.4 Megapixel resolution. The DigiVet DR comes with VXvue, a user-friendly and versatile imaging software that is compliant with the DICOM 3.0 standard. Scintillator: CsI(Tl)

- ▶ Panel technology: a-Si TFT with PIN diode
- ▶ Pixel Pitch: 140 x 140 um
- ▶ Resolution: 9.4 Megapixel (3,072 x 3,072 pixels)
- ▶ Image size: 17" x 17" (43 cm x 43 cm)
- ▶ A/D Conversion: 14 bit
- ▶ Grayscale: 16,384 grayscales
- ▶ Interface: Gigabet Ethernet
- ▶ Automatic Exposure Detection (AED) imaging technology
- ▶ Dimensions (in mm): W 470 x L 470 x H 15

EICKEMEYER® PAWSITIONER

The Pawsitioner is designed to secure patients for surgery and hands-free diagnostic imaging. It eliminates the need for tie-downs and makes it easy to clip and scrub patients in the prep room then transport them to surgery without having to re-position. Each cradle is shaped and contoured to allow for maximum surgical exposure and manoeuvrability while on the surgery table. The Pawsitioner is also ideal for hands-free radiographic positioning, including V-D, left or right lateral, V-D pelvis for OFA evaluation, rostral-caudal skull views and much more without re-positioning the patient for each radiograph. The cradle may also be used to hold patients for laparoscopy, CT, MRI, myelography and ultrasonography.

MOTIC B1 ELITE LED MICROSCOPE

tartu@
estdoma.ee

veterinaartarvikud.ee

MOTIC's B1 series has long been a stalwart of reliable microscopy providing a solid platform for imaging. In this new B1 Elite version, we have upgraded it with new optics and mechanics normally only found in more expensive models, which ensures this line's competitiveness and performance well into the next decade.

- ▶ Binocular tube, sliding type, 45° viewing angle
- ▶ Diopter adjustment: On both tubes: ± 5 diopter
- ▶ Interpupillary distance: 55 – 75 mm
- ▶ Semi-Planachromatic Objectives: 4x/0.10, 10x/0.25, 40x/0.65, 100x/1.25 Oil
- ▶ Mechanical stage with coaxial controls, 140 x 135 mm
- ▶ Focusable Abbe condenser with iris diaphragm
- ▶ 3 W LED illumination with intensity control

710003

€ 650

MOTIC BA210 AND MOTICAM BT8X PLUS CAMERA TABLET

Motic BA210 LED Microscope

The MOTIC BA210 LED microscope is a robust instrument that provides professional and repeatable results to the veterinary practice. EC Plan Achromat Objectives made of high quality optical glass enhance images even with weak slide stainings.

- ▶ Trinocular tube, Siedentopf type, 30° viewing angle
- ▶ Widefield eyepieces with diopter adjustment ± 5
- ▶ Interpupillary distance: 55 to 75 mm
- ▶ EC Plan Achromat Objectives: 4x/0.10, 10x/0.25, 40x/0.65, 100x/1.25 Oil
- ▶ Mechanical stage with coaxial controls, 140 x 135 mm
- ▶ Focusable Abbe condenser with iris diaphragm
- ▶ LED illumination 3 W with intensity control

EICKLOXX SMALL OSTEOSYNTHESIS SYSTEM

The EickLoxx Small is a polyaxial locking kit for dogs and cats up to 15 kg.

The system distinguishes itself through the polyaxial placement of the custom-fit screws and combines the advantages of a locking plate system with polyaxial screw placement in $\pm 15^\circ$ longitudinal and transverse pivoting.

Compared to conventional osteosynthesis systems, the use of locking systems (internal fixation) such as the EickLoxx Small facilitates faster healing of fractures and improved implant strength. It is for this reason that the removal of plates and screws is rarely indicated.

The biologically advantageous titanium plates are available in three sizes and can be cut to the desired length and bent in three planes. Specially designed tools are included to perform this. Titanium also reduces artefacts in post-operative imaging.

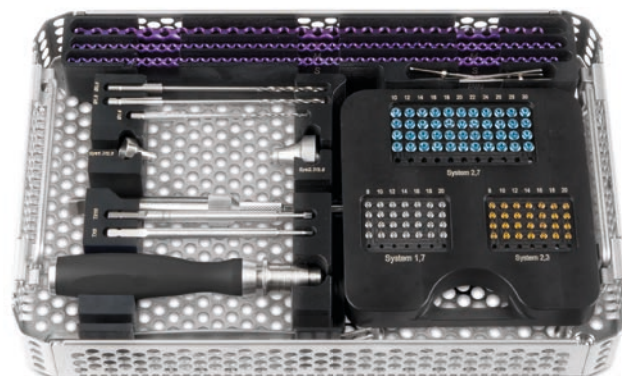

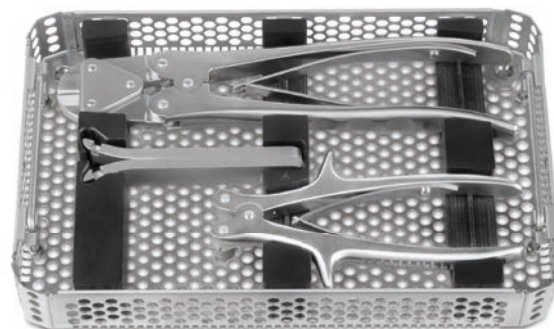

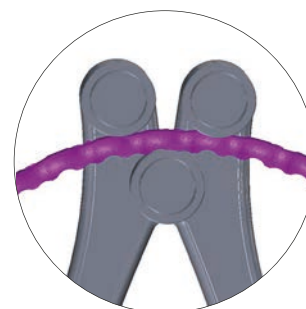

EickLoxx Small is a modular system. All implants and instruments are made in Germany using only the highest quality materials.

Set includes

- ▶ EickLoxx Small Instrument Tray
- ▶ EickLoxx Small Implant Tray
- ▶ EickLoxx Small Screw Rack
- ▶ TAURUS Plates and Wire Cutting Pliers
- ▶ Plate Bending Pliers with Rollers
- ▶ EickLoxx Bending Levers (Pair)
- ▶ 3 Twist Drills with AO Quick Coupling (\varnothing 1.4 mm, \varnothing 1.8 mm & \varnothing 2.0 mm)
- ▶ 2 Screwdriver Blades (Torx 6 & Torx 10)
- ▶ 2 Drill Guide Funnel Systems (1.7/2.3 & 2.7/3.5)
- ▶ Plate and Screw Holding Forceps
- ▶ Silicone Screwdriver Handle
- ▶ 4 Plate Positioning Pins
- ▶ Depth Gauge
- ▶ EickLoxx Small Bone Plate, 46 hole, System 1.7/2.3, Dimensions (in mm): L 230 x W 5.0 x H 2.0
- ▶ EickLoxx Small Bone Plate, 41 hole, System 1.7/2.3, Dimensions (in mm): L 225 x W 6.5 x H 2.4
- ▶ EickLoxx Small Bone Plate, 28 hole, System 2.7, Dimensions (in mm): L 224 x W 8.0 x H 2.7
- ▶ 28 Titanium Locking Screws \varnothing 1.7, silver (from 8 – 20 mm)
- ▶ 28 Titanium Locking Screws \varnothing 2.3, gold (from 8 – 20 mm)
- ▶ 44 Titanium Locking Screws \varnothing 2.7, light blue (from 10 – 30 mm)
- ▶ Container, dimensions (in mm): L 312 x W 183 x H 122

€ 3500

Hindadele lisandub käibemaks +20%

The universal polyaxial osteosynthesis system for small animals

The newly developed EickLoxx Large is a polyaxial locking system for dogs with a weight of approx. 15 to 65 kg.

Just like the EickLoxx Small, the system is characterised by a polyaxial placement of the precisely shaped screws and therefore combines the advantages of locking systems and the possibility of placing screws at an angle of up to $\pm 15^\circ$. Like the EickLoxx Small, the EickLoxx Large offers the advantage of rapid fracture healing with improved implant strength. It is for this reason that the removal of plates and screws is rarely indicated.

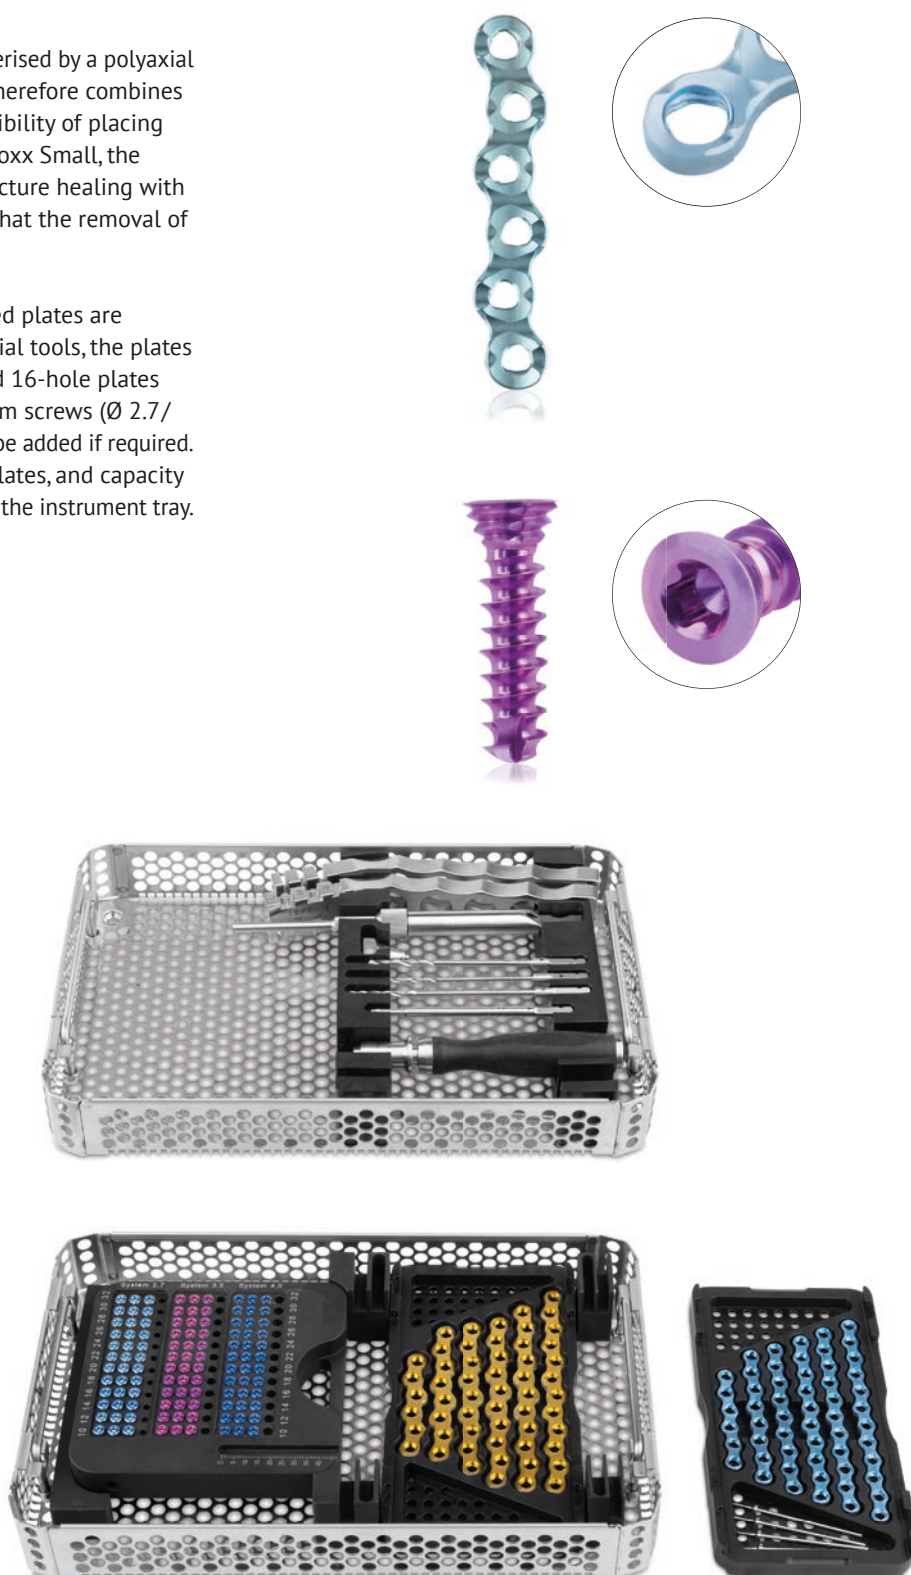

The biologically advantageous titanium S-shaped plates are available in eight different sizes. Thanks to special tools, the plates can be bent in all three planes. The long 14- and 16-hole plates (3.2 and 4.5 mm) as well as the long 34 to 40 mm screws (\varnothing 2.7/3.5/4.0) are not included in the basic set and can be added if required. There is space in the implant tray for the long plates, and capacity for the module for the long screws (not shown) in the instrument tray.

Set includes

- ▶ EickLoxx Large Instrument Tray
- ▶ EickLoxx Large Implant Tray
- ▶ EickLoxx Large Screw Rack
- ▶ 2 Bone Plate Modules
- ▶ EickLoxx Bending Levers (Pair)
- ▶ 3 Twist Drills with AO Quick Coupling (\varnothing 2.0 mm, \varnothing 2.5 mm & \varnothing 2.9 mm)
- ▶ Screwdriver Blade (Torx 10)
- ▶ Drill Guide Funnel System 2.7/3.5/4.0
- ▶ Plate and Screw Holding Forceps
- ▶ Silicone Screwdriver Handle
- ▶ 4 Plate Positioning Pins
- ▶ Depth Gauge
- ▶ 6 EickLoxx Large Bone Plates, 4.0 mm, gold (6–12 holes)
- ▶ 6 EickLoxx Large Bone Plates, 4.5 mm, light blue (6–12 holes)
- ▶ 36 Titanium Locking Screws, \varnothing 2.7 mm, light blue (from 10–32 mm)
- ▶ 36 Titanium Locking Screws, \varnothing 3.5 mm, magenta (from 10–32 mm)
- ▶ 36 Titanium Locking Screws \varnothing 4.0 mm, blue (from 10–32 mm)

ZLIG – NEW TECHNIQUE FOR CRUCIATE LIGAMENT REPLACEMENT (CRCL)

Zlig – the history

The tear of the anterior cruciate ligament is still one of the most common orthopaedic diseases in dogs. The path of the many surgical methods developed for this vary from intracapsular and extracapsular techniques to modern corrective osteotomies that alter the geometry of the affected knee joint. With the development of new materials in medical technology, it is now possible to replace the cranial cruciate ligament in an anatomically correct manner, instead of changing the forces acting on the joint. After a long period of preparatory work by the French Dr Jacques-Phillipe Laboureau, a suitable synthetic ligament is now available for the intra-articular cruciate ligament replacement in small animals. Together with the instrumentation developed by EICKEMEYER®, this new technique for cruciate ligament replacement can now be performed.

Zlig – the implant

The Zlig consists of ultra-high-molecular polyethylene with the special feature that the woven structure of the implant is interrupted intra-articularly by “free fibres”. Free parallel fibres reduce fatigue and also encourage the ingrowth of fibroblasts and collagen. Each implant is delivered in a sterile packed sleeve, making it easier to handle the implant before it is inserted into the joint. A selection of sizes with different resistances and fibre lengths are available to fit different patient sizes.

Zlig – the technology

In this technique, an artificial ligament is used as a total replacement for the anterior cruciate ligament using tunnel-tunnel-technique. The ligament is fixed in the tibia and Os femoris using specially developed cannulated interference screws in drill channels. The screws are guided parallel to the ligament using a guiding wire to avoid deviations. The technology does not cause irreversible damage and the results are reproducible thanks to a quick learning curve. Another great advantage of the technique is the fact that patients can put weight on the hind leg immediately after the operation without any risks.

Zlig – the instrumentation

A small and inexpensive set of instruments is required to perform this new and innovative cruciate ligament surgery method. The threads of the specially developed titanium interference screws are round so they do not cause any damage to the fibres of the Zlig.

Zlig Instrument and Screw Set

Complete set consisting of

- ▶ Zlig Instrument Tray with screw module for interference screws
- ▶ 5 Twist Drills, cannulated, with round shank (Ø 2.5/3.0/3.6/4.2 & 5.0 mm)
- ▶ 1 Twist Drill, not cannulated, with round shank (Ø 4.0 mm)
- ▶ Hexagon KIRSCHNER Wire
- ▶ Attachment for hexagon KIRSCHNER Wire, HEX 2.5, AO coupling
- ▶ Screwdriver Handle made of silicone, HEX 2.9, AO coupling
- ▶ 2 Screwdriver Blades, cannulated (HEX 2.0 & 2.5)
- ▶ 4 KIRSCHNER Wires, trocar/trocar (Ø 1.0 & 1.8 mm)
- ▶ 4 KIRSCHNER Wires, blunt/blunt (Ø 1.0 & 1.8 mm)
- ▶ 2 Tubes for wire loops, cannulated (Ø 2.5 & 3.5 mm)
- ▶ 2 Wire Loops
- ▶ 4 Titanium Interference Screws, cannulated, Ø 3.0, blue (8 mm)

KOWA SL-17 PORTABLE SLIT LAMP

tartu@estdoma.ee

veterinaartarvikud.ee

The KOWA SL-17 Slit Lamp provides optimum stereoscopic observation with selectable magnifications and slit widths within a compact, lightweight, portable unit. With its non-slip ergonomic grip, the SL-17 provides maximum operator comfort during lengthy examinations.

Features

- ▶ Ergonomic and lightweight – only 790 g
- ▶ Continuously variable LED illumination from 10 K to 20 K lux
- ▶ Choice of 10x and 16x magnifications
- ▶ 4 slit widths: 0.1 mm, 0.2 mm, 0.8 mm and Ø 12 mm
- ▶ Spot illumination: Ø 1 mm, Ø 5 mm, Ø 12 mm
- ▶ 1 mm slit length for observing the anterior chamber flare
- ▶ Built-in cobalt blue filter
- ▶ Standard AAA batteries for up to 280 minutes operation

Technical specifications

- ▶ Interior angle: 13°
- ▶ Working distance: approx. 80 mm (at 16x magnification), approx. 100 mm (at 10x magnification)
- ▶ Field of view: Ø 10 mm (at 16x magnification), Ø 15 mm (at 10x magnification)
- ▶ Viewing distance: 50 to 72 mm
- ▶ Eyepiece dioptic adjustment: -8 to +5D
- ▶ Slit projection angle: horizontal: ±60°
- ▶ Power input: DC 4.8–6.4 V (4x AAA batteries)
- ▶ Dimensions (in cm): W 22 x D 9.5 x H 22.5
- ▶ Weight: 790 g (incl. batteries)

EICKEMEYER® OPHTHALMIC KITS

Our Ophthalmic kits have been reviewed and approved by an experienced diplomate of the European College of Veterinary Ophthalmology. Both kits include a high quality sterilisation container with a green or red lid and a silicone insert to protect the high quality instruments. Detailed information on the contents of the kits can be found on www.eickemeyer.com/Ophthalmology.

Starter Ophthalmic Kit

This instrument kit provides fundamental equipment for veterinary ophthalmic procedures including eyelid, third eyelid and eyelash surgery, conjunctival and corneal cytology/biopsy and enucleation.

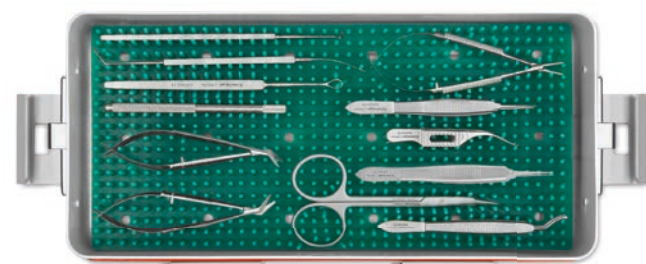

171200

€ 450

Advanced Ophthalmic Kit

This instrument kit provides the necessary instrumentation for the veterinary surgeon to perform corneal, conjunctival and intraocular procedures.

EICKVIEW PORTABLE LED VIDEO ENDOSCOPES

Due to their extremely compact dimensions, the EickView LED Video Endoscopes are the perfect solution for broncho-, gastro-, rhino-, tracheo-, uretero- and vaginoscopy in dogs and cats and for the examination of the upper respiratory tract in horses. The devices work independently, as the powerful LED light source and the high resolution camera of the stand-alone systems are integrated in the distal end of the endoscopes. In addition, the folding 3.5" monitor allows both direct video and image playback as well as storage via SD card. Furthermore the EickView LED Video Endoscopes can be connected to a separate monitor.

- ▶ Folding 3.5" monitor for video and picture playback
- ▶ Recording and archiving on integrated SD card
- ▶ File formats: JPG, AVI
- ▶ Integrated powerful LED light source
- ▶ Rechargeable Battery with up to 3 hours of operation
- ▶ USB port and video out
- ▶ Depth of field: 5 – 60 mm
- ▶ Direction of view: 0°
- ▶ Field of view: 110°

EICKVIEW HD LED USB VIDEO ENDOSCOPES

tartu@estdoma.ee

veterinaartarvikud.ee

You can now combine the new EickView HD Video Endoscope System according to your wishes and requirements.

EickView HD Video Processor

The EickView HD Video Processor is the central hub of your video endoscope system. The powerful LED light source enables optimal illumination in any position. Various settings on the video processor allow you to adapt the image quality to your needs. The new HbE mode enables an improved display of vessels. Still images can easily be saved directly to a USB storage medium. The image data can be transferred to an existing PC or Laptop.

306167

€ 3 600

EickView PRO HD Upgrade

The EickView PRO HD Upgrade turns the HD Video Processor into a stand-alone and mobile endoscopy unit. Furthermore it opens access to other endoscopic disciplines such as arthroscopy, rhinoscopy, otoscopy, etc. The foldable and rotatable Full HD Touch Screen Tablet provides greater functionality because the tablet can not only be used to view images and videos but also for recording, storage and editing. Further advantages of the upgrade are the easy to use imaging software, a keyboard and mouse for easy patient and image management as well as a USB hub for connecting an optional USB endoscopy camera.

30616701

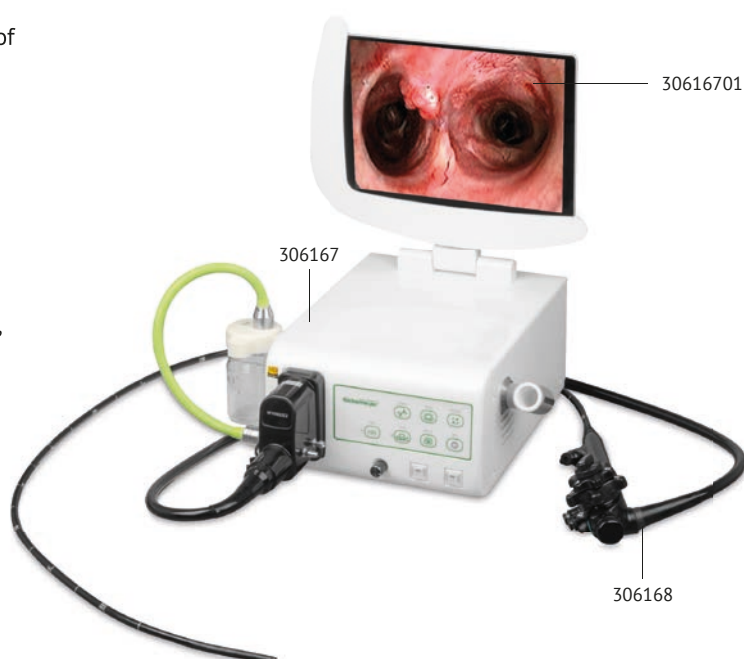

€ 2 200

EickView HD Video Endoscopes

Due to further improved video chips, the EickView HD Video Endoscopes deliver even more brilliant images. The main areas of application are bronchoscopy and gastroscopy. Due to the large number of available scope sizes, they are suitable for all applications in small animals and equine.

Technical specifications

- ▶ Viewing direction: 0°
- ▶ Distal end contains 1 CMOS camera chip, 2 light guides, working channel, lens rinsing nozzle
- ▶ Scope of delivery: EickView video endoscope, pressure tester, 2 cleaning brushes, cleaning set, carrying case

MELAG AUTOCLAVE MELATRONIC 23 EN

MELAG autoclaves have proven themselves for decades in many veterinary practices. MELAG is a world leader in the hygiene sector, and through a constant development in products, a high quality level is ensured. Also an extensive network of service partners offers reliable service, including after sales service.

MELAtronic® 23 EN works with a fractionated, microprocessor controlled gravity system, which rapidly reduces the content of remaining air and effectively attains saturated steam. The complete sterilisation cycle takes place automatically. An integrated water quality monitor, a water level indicator and a double-spaced alphanumeric display makes it easy to use. In the Universal program "S", wrapped instruments can be sterilised. With the Quick program "N", a small number of quickly required unwrapped instruments are readily available again after 17 to 21 minutes.

- ▶ Compact, robust and reliable
- ▶ Integrated water quality monitoring
- ▶ Microprocessor controlled unit with active drying
- ▶ Up to 5 trays (sold separately) with a total weight of 4 kg of solid or 400 g of porous loads can be sterilized
- ▶ Chamber Size: 19 litres, Ø 23 x D 45 cm
- ▶ Unit weight: 30 kg
- ▶ Unit Dimensions (in mm): W 510 x H 380 x D 550

MELAG VACUVET AUTOCLAVE – B CLASS

The MELAG Vacuvel 23 B+ is an extremely reliable and effective B Class vacuum autoclave, which makes it possible to sterilise various load sizes in the veterinary practice. It requires minimal installation to work in your practice and its integrated funnel-shaped opening for the water storage tank makes it easy to fill with demineralised or distilled water.

- ▶ Large load quantities and short program cycles
- ▶ Reliable sterilisation and simple operation
- ▶ Pre-heated chamber for improved drying results
- ▶ Chamber Size: 23 litres, Ø 25 x D 45 cm
- ▶ Maximum load: 5 kg instruments, 1.8 kg textiles
- ▶ Includes 3 trays, but can accommodate up to 5
